Summary

Data analyst and First-place hackathon winner through the Digital through the Digital Egypt Builders Initiative (DEBI), with a Finance background and hands on experience in operational data analysis, and business process improvement. Skilled in SQL, Power BI, and Excel, with experience in dashboards development, tracking KPIs and supporting business performance reporting and data quality. Currently seeking a full-time data analyst opportunity where I can leverage my analytical skills to drive data-driven decision-making and continuous process improvement.

Experience

Innerwin Academy **Aug 2026 – Oct 2026**
Data Analyst (Internship) **Cairo, Egypt (On-site)**

- Analyzed 11.6K+ sales leads and 99K+ customer interactions to evaluate course performance, sales funnel efficiency, lead quality, and conversion trends.
- Built an interactive Power BI dashboard tracking KPIs across courses, sales representatives, lead sources, customer statuses, and follow-up activity, identifying that 82.5% of all bookings occurred within the most recent 3 months.
- Delivered data-driven recommendations to improve lead prioritization, follow-up management, sales performance, source attribution, and overall lead-to-booking conversion.

Digital Egypt Builders Initiative (DEBI) **Nov 2025 – Sep 2026**
Data Analytics Trainee **Cairo, Egypt (Hybrid)**

- Selected for a competitive 9-month government-backed Data Analytics program focused on real-world business intelligence applications.
- Completed hands-on projects in data cleaning, analysis, and dashboard reporting using Excel, Power BI, SQL and Python.
- Achieved **1st** place among 20 teams contributed in a program-wide Hackathon (attended by IBM representatives who served as judges and other major companies) as part of a team project analyzing e-commerce operations data using SQL and Power BI.

Talabat Egypt **Feb 2024 – Aug 2025**
Content Specialist **Cairo, Egypt (On-site)**

- Managed vendor requests and ensured accurate processing of promotional content across multiple markets, maintaining data consistency within internal systems.
- **Proactively identified** a recurring vendor complaint pattern regarding promotions and independently flagged it to management.
- Investigated the root cause through data analysis, tracing the issue to a specific internal workflow step, and presented findings to senior managers.
- Collaborated with management to redesign the cancellation workflow, resolving the issue completely within 6 weeks.

Projects

Telecom Customer Churn Analysis | Power BI (GitHub)

- Built a 3-page Power BI dashboard (Who → When → Why) analyzing 7,043 telecom customers, quantifying a 26.54% churn rate and $3.68M in lost revenue; cleaned data in Power Query and modeled it as a star schema with DAX measures.
- Found that customers in their first 12 months drive ~65% of all churn, and that Month-to-Month contracts churn at 45.84% vs. 2.55% for Two-Year contracts, pointing to onboarding and contract-commitment incentives as the highest-impact retention levers.
- Designed a minimum-sample-size DAX measure to rank cities by churn rate instead of raw counts, exposing high-risk areas (e.g., Temecula, Lakewood) that large-city counts hid, and delivered 6 data-backed recommendations including staff training and an infrastructure review.

Maven Fuzzy Factory — E-Commerce Performance Analysis | SQL, Power BI (GitHub)

- Built and queried a 6-table relational database in MySQL with 1M+ rows, writing SQL scripts and subqueries to clean and structure raw transactional data for analysis.
- Analyzed traffic sources, bounce rates, and usage windows — revealing a mobile UI gap (desktop outnumbers mobile) — pinpointing $1M+ revenue drivers and marketing channels to prioritize.
- Automated parts of the data-cleaning process using SQL and Power Query, then designed a 3-page Power BI dashboard to present findings.

Udemy Courses Market Analysis | Python, Streamlit (GitHub | Live App)

- Analyzed a +3500-course Udemy dataset using Python (Pandas, NumPy) to identify revenue and engagement drivers across subject categories, pricing and course levels.
- Built and deployed a Streamlit report covering correlation analysis, engagement benchmarking (free vs. paid) and time-trend analysis of market growth from 2012 to 2017.
- Identified Web Development as the leading category in revenue and subscriber demand, with 8 of the top 10 highest-earning courses — revealing a completion gap in Beginner-level courses.

Education

Faculty of Commerce (English Section) – Helwan University **2019 — 2022**

BA- Business Administration and Finance.

Certificates

- Data Skills for Excel Professionals Specialization – Coursera (CFI)
- Power BI Fundamentals – Coursera (CFI)
- Intermediate DAX & Time Intelligence – Coursera (CFI)
- Introduction to Databases – Coursera (Meta)
- SQL (Intermediate) – HackerRank

Technical Skills

Microsoft Excel & Power BI: Advanced formulas, (VLOOKUP/XLOOKUP), Pivot Tables, Power Query, Power Pivot, automation, Data modeling, DAX, dashboards, visualization, automated reporting.
Google Sheets: formulas & functions, LOOKUP values, pivot tables, collaborative reporting.
Databases & SQL: Relational databases, querying, joins, subqueries, aggregations, CTEs, analytical problem-solving.
Python: Foundational knowledge, NumPy & Pandas (working knowledge).
Data Skills: Cleaning, messy data handling, EDA, ETL, normalization, transformation, KPI tracking.
AI-Assisted Tools: AI for faster repeated work, development, debugging, and analytical workflows.

Language

Arabic (Native) **English (Professional)**
